1. BASIC INFORMATION ABOUT THE SERVICE POINT

1.1 Introduction

Euroports Hanko Oy has made this service point document which is required in the Finnish law (1302/2018) and by the Commission Implementing Regulation 2017/2177.

Our service point in the Western Harbour is a freight terminal, referring to directive 2012/34 attachment II 2 b). The service point is specialised in regular liner services to serve RoRo, Sto-ro and Lo-Lo vessels. Western Harbour has facilities for RoRo traffic, rails, warehouses and open fields.

This document is published here:

5.2 Possibilities for
production of own services

No

5.3 IT systems
offered and terms of
use

No

6. CAPACITY ALLOCATION

6.1 Applications for services

Applications for access to services are processed in accordance with the law, together with the operator of the service point, the customer and the railway operator. The applications must include time schedule and cargo volumes in order to reserve suitable resources for cargo handling.

Please send the applications to goran.eriksson@euroports.com. They will be processed within 14 days in normal cases, and within 30 days in situations where, for example, the use of capacity requires a longer processing time.

6.2 Responding to applications

If it is not possible to receive all goods, the priority is applications that has already been granted. We also follow the coordination procedure decree of Commission Implementing Regulation.

In situations where longer-term capacity scarcity are likely, Euroports Hanko aims to increase the total capacity.

6.3 Information about temporary capacity limits

Information about possible temporary capacity limits can be found at: <https://europortshanko.fi/en/news/>
